

February 8, 1973

it might be some faster action in getting these funds unimpounded but I have no objection to having it brought to a public hearing but I thought, maybe, if there was enough agreement among the Legislators we could dispose of it this way. If they want a public hearing, I have no objections.

SENATOR ANDERSON: As one Senator only, I'm extremely reluctant to see us suspend the Rules on anything unless there is urgency. If there is a public hearing coming up in Washington or something that we could have some impact on, fine but otherwise, I would just as soon see it go through the normal procedure. The other thing I would like to say is that I, too, am very concerned about #3 which Senator Syas and Senator Stahmer have addressed themselves to. I am no city people, I'm country people but I do think that for people in the United States to continue saying that we can't address ourselves to the needs of mass transit that this is simply blind subservience to the idea that progress can be defined by the yards of concrete we are pouring or the size of our automobile junkyards and I don't think this is the way to go. So, I would be extremely reluctant to support this Resolution unless we can drop out #3.

SPEAKER: I suppose that the chair imagines that someplace along the line here we had better take some action to suspend the Rules here and take up the Resolution. The chair next recognizes Senator Keyes, then Senator Whitney, then Senator Nore, then Senator Carpenter, it looks like.

SENATOR KEYES: This #3 Section has quite a bit of opposition to it. I wonder if Senator Hasebroock would approve of taking #3 out and rewriting it to state, that the state, get this fact across to the Federal government, that the Legislature of the state of Nebraska would advise the Federal government either to balance this budget, increase taxes or cut spending and get those in line so that our dollar is not completely eroded out of the picture.

SENATOR HASEBROOCK: Well, he's got a good point but that is a little beyond the scope of this Resolution.

SPEAKER: Well, the chair recognizes Senator Whitney.

SENATOR WHITNEY: Mr. President, I think Senator Keyes has made some very brilliant statements here this morning. I feel that definitely what he said is in the scope of this Resolution. What the Nixon administration is attempting to do is to stop so much spending in order to stop inflation. That's the purpose of it but I do not think this Legislature has to worry about this because the Democrat Congress, I am certain, will not permit the Nixon administration to impound these funds anyway in a short time.

SPEAKER: The chair is going to observe that the motion actually before us is to suspend the rules and take up the Resolution. Senator Hasebroock, do you care to make any closing arguments on your motion just to take up the Resolution? Actually, the motion before us is just to suspend the Rules and take up the Resolution.

SENATOR HASEBROOCK: I think I would move that we refer it to a Committee for a public hearing.

SPEAKER: Well, let's take it up first, Senator. I guess before we can refer it we have to take it up. Do you want to substitute. You are substituting this motion for the other one.

SENATOR HASEBROOCK: Yes.

SPEAKER: You want to refer it to a Committee. Just a moment.

SENATOR HASEBROOCK: I can withdraw the other motion. Can I withdraw the other motion?
